POP-Declaration in accordance with Regulation (EU) 2019/1021

POP stands for **Persistent Organic Pollutants**. These are organic pollutants that remain intact in the environment for extremely long periods of time, become widely distributed throughout the environment via natural soil, water, and air movement, accumulate in living organisms and the food chain, and cause damage to human health and the environment.

The POP-Regulation (EU) 2019/1021 transposes the international POP agreements of the "Stockholm Convention" and the "Convention on long-range transboundary air pollution" into European law.

Based on the information we receive from our suppliers, Leister Technologies AG hereby declares to the best of its knowledge and belief that all its products comply with Regulation (EU) 2019/1021 on persistent organic pollutants.

Our products do not contain any of the substances currently listed in Annex I or II of the Regulation.

Kaegiswil, 27.05.2022

A handwritten signature in black ink that reads "Bruno von Wyl". The signature is written in a cursive style and is positioned above a horizontal dotted line.

Bruno von Wyl
(Chief Technical Officer)
